Meeting Minutes

Meeting No	81
Meeting Date	5 September 2024
Venue	Dean's Office Building, Hall A

AGENDA ITEMS

1. Review of the matters to be carried out within the scope of the board's activities

DECISIONS

1. It was discussed that the course schedules had been completed and that the availability of the lecture halls needed to be arranged for the examination dates to be held in Terms 1, 2, and 3, and the Dean's Office reported that the necessary checks would be carried out.

2. It was shared as information that the course schedules of Terms 1, 2, and 3 had been reviewed by the coordinators (in terms of hours and content), that consistency between the schedule and the header information had been ensured, and that the necessary arrangements had been made.

3. It was shared as information that the rearrangement of the joint topics — previously decided upon and whose work has been continued by the relevant departments — that are taught by the Departments of Biophysics and Physiology in Term 2 with different content but the same course name, had been completed, and that the changes are included in the Term 2 course schedule, in Course Committee 2, as follows:

- 22BYF.06 (Biophysics) — Biomechanical and electrophysiological properties of the atria and their effects on the ECG. Instructor: Dr. Mustafa NAZIROĞLU. Learning objective: Atrial ECG, pressure, and volume changes will be taught.

- 22FIZ.L03 / 22BYF.L03 — Physiology Laboratory Group A / Biophysics Laboratory Group B. Content — Physiology Laboratory: Leukocyte formula. Biophysics Laboratory: Determination of hemoglobin by the cyanomethemoglobin method (determination of hemoglobin with a spectrophotometer); examination of pressure and resistance in the circulatory system by spectrophotometric methods. Instructor(s) — Physiology Laboratory: All faculty members. Biophysics Laboratory: All faculty members/instructors. Learning objective — Physiology Laboratory: Teaches the skill of peripheral blood smear. Biophysics Laboratory: Knows the factors that change the serological properties and viscosity of blood; knows how to measure, by spectrophotometric methods, the factors causing changes in pressure and resistance in the circulatory system.

- 22FIZ.L03 / 22BYF.L03 — Physiology Laboratory Group A / Biophysics Laboratory Group B. [Same content, instructor(s), and learning objective as above.]

- 22FIZ.L03 / 22BYF.L03 — Physiology Laboratory Group B / Biophysics Laboratory Group A. [Same content, instructor(s), and learning objective as above.]

- 22FIZ.L03 / 22BYF.L03 — Physiology Laboratory Group B / Biophysics Laboratory Group A. [Same content, instructor(s), and learning objective as above.]

- 22BYF.07 (Biophysics) — Biomechanical and electrophysiological properties of the ventricles and their effects on the ECG. Instructor: Dr. Mustafa NAZIROĞLU. Learning objective: Ventricular ECG, pressure, and volume changes will be taught.

- 22FIZ.L04 / 22BYF.L04 — Physiology Laboratory Group A / Biophysics Laboratory Group B. Content — Physiology Laboratory: Determination of the Hct-Hb constant. Biophysics Laboratory: Determination of intra-erythrocyte fluid volume; determination, by biophysical techniques, of the effects of the change in viscosity on the circulatory system. Instructor(s) — Physiology Laboratory: All faculty members. Biophysics Laboratory: All faculty members/instructors. Learning objective — Physiology Laboratory: Teaches the practice of hematocrit and hemoglobin determination. Biophysics Laboratory: Knows the factors that change the serological properties and viscosity of blood; knows how to measure, by biophysical techniques, the effects of the change in viscosity on the circulatory system.

- 22FIZ.L04 / 22BYF.L04 — Physiology Laboratory Group A / Biophysics Laboratory Group B. [Same content, instructor(s), and learning objective as above.]
- 22FIZ.L04 / 22BYF.L04 — Physiology Laboratory Group B / Biophysics Laboratory Group A. [Same content, instructor(s), and learning objective as above.]
- 22FIZ.L04 / 22BYF.L04 — Physiology Laboratory Group B / Biophysics Laboratory Group A. [Same content, instructor(s), and learning objective as above.]

4. It was discussed that the "ECG Integrated Session," which had previously been decided to be added to Term 2 Course Committee 2, had not been added to the schedule. It was discussed once again that the ECG Integrated Session, to be jointly organized by the Departments of Cardiology, Biophysics, and Physiology, is useful and necessary, and it was decided that it would be added to the schedule.

5. It was decided that it would be appropriate for the following topics to be presented to Term 6 students within the framework of the "Meeting with Intern Physicians" event.
