

SÜLEYMAN DEMİREL UNIVERSITY
FACULTY OF MEDICINE
Medical Students' Council (T.Ö.K.)

Meeting Minutes

Meeting Date	22 November 2022
Venue	Dean's Office Building, Meeting Hall A

DECISIONS

The meeting of the Süleyman Demirel University Faculty of Medicine Student Council (SDÜ-TFÖK) was held on 22.11.2022 under the chairmanship of Muhammet Emin AĞIR, in Meeting Hall A of the Dean's Office Building, with the participation of the commission members.

At the meeting:

1. A grievance has arisen because the pointer device previously present in the Term 1 lecture hall is no longer there; a new pointer device is requested from the Dean's Office,
2. The clock device in the Term 1 lecture hall has broken down and has not been fixed despite repairs. Students request that the problem be resolved through repair or replacement,
3. The ventilation temperature in the lecture halls is very hot, and the oppressive heat does not pass even when the windows are opened. In order to prevent the waste of our state's resources and to resolve this grievance, our board has found it appropriate for the temperature to be lowered somewhat and for heating to proceed at lower levels until otherwise requested, and this has been submitted to the Dean's Office,
4. When the opening time of the Term 2 lecture hall extends beyond 8:00, congestion occurs; therefore, it is requested that the staff in charge be informed again on this matter and that regularity be ensured,
5. Due to the excessive heat combined with sunlight in the study halls, it is not possible to sit at the tables located by the windows. It has been considered that this problem could be resolved quite easily with roller blinds; it has been stated that requesting these — from our storage if available there, or otherwise from our university's construction works department — and installing them in the upper- and lower-floor study halls would positively affect study comfort,
6. As previously stated at earlier meetings, it is requested that, before the winter months begin, the path between the plane tree and the faculty be covered with gravel or paving stones so that students are not disadvantaged, and the support of our faculty secretariat is requested for this,
7. The doors of the study rooms creaking loudly and being difficult to open is causing a problem. It is requested that the doors be oiled and made easy to open,
8. It was proposed to the Dean's Office that, once the hospital annex building is opened and the relocation from the classrooms takes place, the entire General Surgery classroom (classroom 7) be established as a student study hall. It was requested that preparations be started on this matter now, so that the necessary shortages of tables and chairs be addressed,
9. It was requested that the projectors in the classrooms be cleaned and maintained.
10. Because the microphone system in the Internal Medicine classroom has an echo, causes interruptions during speech, and creates delay, students are disadvantaged and the efficiency of the lesson decreases. It is requested that the necessary action be taken on this matter.
